

Case Study

Buxton, Derbyshire

Product Type:

Refurbishment Bridge

Term:

12 Months

Property:

Flats above a commercial unit

Exit:

Refinance on to commercial mortgage

Overview:

Black & White Bridging have provided a bridging loan to fund the refurbishment works for two residential flats above a commercial property. The property is a three storey Grade II listed building originally constructed in the 1800s. The client, an experienced builder, is self-building the project and is aiming to create quality accommodation finished to a very high standard.

The refurbishment bridge for our client will be used on a very complex property consisting of two semi-commercial properties with commercial tenants, residential tenants in one flat and two other units being refurbished to provide further residential flats to the top floors.

The client plans to exit the facility onto a commercial mortgage.

“ Secured a great deal with Black & White for our client on a complex property. Fantastic customer service from the team throughout and special thanks to the case owner Heather, who helped keep the case on track and over the line to completion.

Tony O'Rourke, Moneypoint Finance
